

Chem-Sure® Tubing

Chem-Sure® peristaltic pump tubing for chemical service is a composite of PTFE and fluoroelastomer. This unique combination allows for unmatched durability and the ultimate chemically resistant tubing for use in flexing environments such as peristaltic pumps. Chem-Sure® tubing is compatible with DMSO, NMP, and MEK. The tubes are available as individual elements in the sizes and lengths.

STA-Pure® Tubing

Sta-Pure® tubing is made of a unique composite of platinum-cured silicone and expanded PTFE. It's exceptional longevity is extremely beneficial for high pressure applications and processes where premature tubing failure is costly. Sta-Pure® tubing provides superior resistance to cracking and abrasion - virtually eliminating spallation. The tubes are available as individual elements in the sizes and lengths.
