

## FEP Heat Shrink Roll Covers

Extend the life and reliability of printing rolls, or wherever a sticky buildup problem needs to be solved quickly and economically. A brief application of heat shrinks the cover snugly around the roll, forming a skin-tight, high-strength jacket impervious to corrosive chemicals, solvents, acids, shock, high temperatures and moisture. Eliminates sticky build-up problems. A convenient heat source, such as a hot air gun, allows roll covers to be quickly shrunk on the rolls. Clean with a solvent or reagent.

**Custom sizes and lengths:** Available and quoted upon request. Also available in PFA.

<u>Item #</u>	<u>Item Name</u>	<u>Minimum Roll Diameter</u>	<u>Maximum Roll Diameter</u>	<u>Ordered As</u>
RTF0102-12	FEP Heat Shrink Roll Covers	0.440 Inch	0.550 Inch	1/2 Inch
