

Vinyl Tubing, Laboratory Grade

**Clear, Flexible, Economical
Non-Toxic.**

Meets FDA Requirements.

Recommended for all laboratory and industrial uses where flexible vinyl tubing is applicable; for handling aqueous foods and other liquids, and for non-critical hospital use such as suction and drainage.

Produced entirely from F.D.A. sanctioned ingredients. All compounding and manufacturing is performed using GMP, assuring consistency of quality and purity.

Highly flexible, for ease of handling.

Its smooth bore and clarity contribute to better material flow and easy observation of contents.

Not recommended for peristaltic pumps.
